Dear Ms. Dortch:

On May 19, 2011, representatives of the fixed wireless Internet service provider (“WISP”) industry met with various Commission personnel to discuss the state of the WISP industry. The WISP representatives included Brian Webster of Wireless Mapping, Stuart Pierce of Avolve Internet Service, Martha Huizenga of DC Access, Forbes Mercy of Washington Broadband and Robert Rini of Rini Coran, PC.

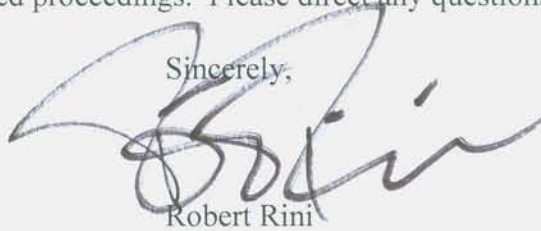

The WISP representatives met with the following Wireless Telecommunications Bureau staff: Bonnie Flynn, Brenda Summers, Susan Mickley, John Lambert, Chris Andes, Tim Hilfiger, Steve Buenzow, Beth Fishel, Ron Fuhrman, Gary Devlin, Ruth Taylor, Terry Fishel, Troy Sieg and Susan Cool.

In the course of the discussions, the WISP representatives presented the materials contained in the attached document, stating:

- (1) the Universal Service Fund should not be used to fund competitors to WISPs that are already providing service;
- (2) access to TV Band white spaces are critical to helping WISPs overcome signal blockage from trees; and
- (3) the 3650 MHz Service registration process should be streamlined to make it easier to register CPE devices, including having the ability to pre-populate ULS with the relevant data and to batch file.

Pursuant to Section 1.1206 of the Commission's Rules, this notice is being filed via ECFS in the above-referenced proceedings. Please direct any questions regarding this notice to the undersigned.

Sincerely,

A handwritten signature in dark ink, appearing to read "Rini", with a large, sweeping initial stroke.

Robert Rini
